

Dear FCC,I was thrilled when XM radio started traffic and weather broadcasts. While travelling, it is very difficult to find local stations that give timely reports. And, I think this is very important. Information about the local weather in different cities ( to pick on friends ) is not available anywhere else!

Allow me, and the other subscribers to satellite radio, to pay for the services we want, and need.

Don't let the "Old Guard" step on the future as thay have tried in the past!

Steve Maloy
